SYLFIRMX

EMERGING DUAL WAVE RF MICRONEEDLING SYSTEM

ULTIMATE EDITION

THE WORLD'S FIRST & ONLY

PULSED WAVE AND CONTINUOUS WAVE RADIO FREQUENCY MICRONEEDLING DEVICE

NOW FEATURING NEW 300 MICRON DEPTH

SYLFIRMX

Improves Skin Complexion¹

Improves Skin Laxity

Minimizes Appearance of Scars

Improves Skin Texture & Tone

Improves Skin Revitalization²

ULTIMATE EDITION

DUAL WAVE RF MICRONEEDLING SYSTEM

PULSED WAVE (PW) & CONTINUOUS WAVE (CW)

The world's first & only FDA registered Pulsed Wave (PW) and Continuous Wave (CW) Radio Frequency Microneedling device featuring 300 Micron depth for ultimate skin complexion¹ and skin revitalization². Sylfirm X with its 8 different PW/CW modes has proven its effectiveness and safety through 25+ clinical studies and experiments.

Minimally Invasive

Short Treatment Time

Minimal Downtime

Safe & Comfortable

Immediate Results

BIPOLAR NON-INSULATED ELECTRODE SYSTEM

SYLFIRM X adopted bipolar non-insulated micro needle electrodes to cover all dermal layers with uniform electric field and maximize the treatment result specifically for skin complexion¹ during the Pulsed Wave (PW) modes, and skin revitalization² during the Continuous Wave (CW) modes.

ROBOTIC PRODUCTION SYSTEM

The micro needles are precisely produced by the robotic system, which brings evenly-leveled electrodes to penetrate an accurate target depth during the treatment.

As a specialist in researching and developing medical device technologies, Viol, the manufacturer of Sylfirm X, is committing their finest effort to deliver the new solutions in clinical treatment. With Viol's bio-electro technologies and products, we believe our customers can enjoy the beauty of the healthier and richer life.

Disclaimer :

SYLFIRM X Ultimate Edition™ is intended for use in dermatology and general surgical procedures for electrocoagulation and hemostasis. (K200185)

¹ Skin complexion treatment targets the basement membrane and vessels to create a visibly more youthful, even toned and textured complexion.

² Skin revitalization treatment targets dermal layers of the skin to increase collagen and elastin fiber through hemostasis and electrocoagulation.

THE INVENTOR

DR. JONGJU NA, M.D PhD.

EDUCATION

- Yonsei University, Medical college, B.A., Medicine
- SoonChunHyang University, Medical college, PhD, Human Anatomy

CAREER

- Founder and President of Viol Co., Ltd and Scarlet RF Inc.
- Biomedical scientist of Cellum Biomedical Inc. in CA, US
- Chief Doctor of Clinic RA
- Chief Doctor of Ewha Dermatology Clinic

ACHIEVEMENT

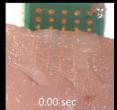

- Inventor of "Na Effect"
- Inventor of "SRF (Short Pulse RF)"
- Inventor & Patent holder of Bipolar Non insulated RF microneedling
- Inventor & Patent holder of DERMAStamp
- Inventor of Multiple Growth Factor (MGF) treatment using microneedling

MINIMAL DOWNTIME. LITTLE TO NO PAIN

NON-INSULATED ELECTRODES

EFFECT

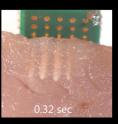

NA EFFECT is an independent electro thermal coagulation around each electrode of bipolar radio frequency. It is distinguished from other bipolar radio frequency tissue reactions which are electro thermal coagulation between both electrodes.

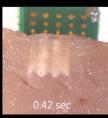

No coagulation

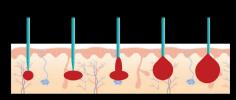

Coagulation starts at the end of electrodes

Independent coagulation around each electrode

Coagulation between bipolar electrodes

Complete coagulation in total dermal layer

UNIVERSITIES & HOSPITALS

MEDICAL LASERS

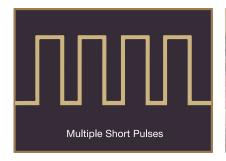

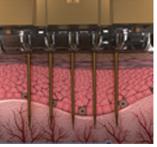

- World's first Pulsed Wave RF microneedling mode.
- PW mode creates selective coagulation on the basement membrane and vessels located within the epidermal junction and upper dermis, with no noticeable effect on the surrounding tissue.
- Provides more stable radio frequency energy.

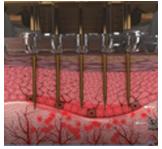

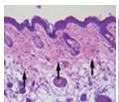

Electrodes inserted into the dermal tissue.

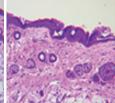

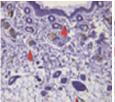

Repeated hyper pulsed RF energy shooting 50~55°.

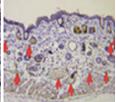

Energy delivered to the basement membrane and abnormal small blood vessel.

Efficacy of Pulsed Wave Needle RF on Skin

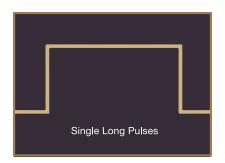

Fig. 4(a)(b)

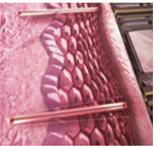

WAVE FORM	PW1	PW2	PW3	PW4
PULSE DURATION	30 msec	40 msec	50 msec	60 msec
	(75% Duty Cycle)	(80% Duty Cycle)	(83.3% Duty Cycle)	(85.7% Duty Cycle)

Reference

- CW mode creates wide, independent coagulation around each electrode.
- The coagulation area continues from deeper dermis to upper dermis with one penetration.
- Promising optimal skin revitalization², for a firmer, more youthful looking appearance.
- Provides more stable radio frequency energy.

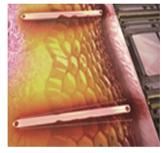

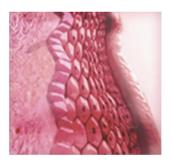

Electrodes inserted into the dermal tissue.

▶ Thermal coagulation

at the target depth

Short pulse RF shooting 55~60°

Thermal energy are delivered along electrodes in total dermal layer.

Non-insulated

needle

LITTLE TO NO PAIN AND ANESTHESIA-FREE TREATMENT

300 MICRON

Optimal Skin Revitalizing² Depth

300 Micron Depth is the only treatment that is capable of treating three layers at the same time: - Epidermis

- Basement membrane
- Papillary dermis

	Target Depth
0.3~0.5 mm	Superficial Layer (Papillary Dermis)
0.8~1.2 mm	Upper Layer (Dermoepidermal junction)
1.5~2.5 mm	Middle Layer (Upper & Mid Dermis)
3.0~4.0 mm	Deeper Layer (Deeper Dermis & S.Q.)

ECM (Extracellular Matrix)

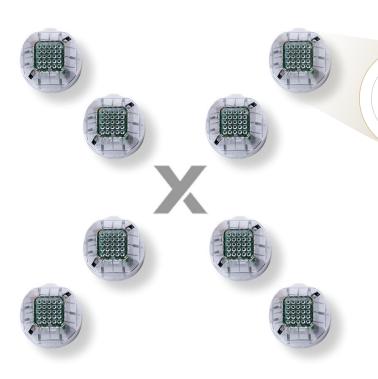

- Provides a physical environment for cells to grow
- Takes a role of connecting cells
- The role of sorting and supplying the necessary biochemical factors
- Composition: collagen, elastin, structural proteins,
 GAG (glycosaminoglycan), growth factors

BM (Basement Membrane)

- ECM's composition
- Collagen Type IV is located on lamina densa of the Basement Membrane
- Support of epidermal stem cells
- Connection of epidermis to dermis

DESIGN SPECIFICATION

AESTHETIC AND INTELLIGENT DESIGN

- Extended stand length
 - » Increase ease of use
- Ergonomic handle
 - » Comfortable for treatment use
- Magnetic foot switch
- Signal controller

- Locking wheel mechanism
- Ease of mobility
- User-friendly interface
- Tip base designed to maximize treatment precision

SYLFIRMX TREATMENT

The world's first and only treatment of its kind featuring both scientifically advanced Sylfirm X Ultimate Edition dual wave radio frequency microneedling device and Exosome Technology, to supercharge and X-Cellerate treatment results.

HOW DOES IT FEEL?

The feeling is described by most patients as comfortable with no pain, only a slight tingling sensation with light pressure. Based on the depth and area treated this feeling can vary.

HOW MANY TREATMENTS ARE NEEDED?

Most physicians find that three to six treatments, spaced four to six weeks apart provide the optimal experience and outcome for patients.

HOW LONG DOES THE TREATMENT TAKE?

The actual treatment takes about 20 - 45 min depending on the area to be treated.

HOW LONG DO THE RESULT LAST?

Everyone is different, but the collagen you make is your own and continues accelerated production over three months.

WHAT IS THE BENEFIT OF APPLYING EXOSOMES REGENERATIVE COMPLEX / EXOSOMES REGENERATIVE COMPLEX+

Exosome Regenerative Complex (ERC) or Exosome Regenerative Complex + (ERC+) is an ideal solution to apply post Syflirm X Treatment. Post treatment application of ERC or ERC+ provides skin with Lyophilized Exosomes, Humectants, Growth Factors and Peptides, Amino Acids, Vitamins, and Coenzymes. Clinical Studies have shown that ERC and ERC + reduce inflammation and redness post treatment, increase fibroblast production by 180%, and increase elastin production by 300%. Adding this solution is a way to cut down on down time, ensure patient comfort, and optimize treatment results.
