CO2LIFT®

CARBOXI GEL

The fastest way to better skin

L I F T[™]
P R O

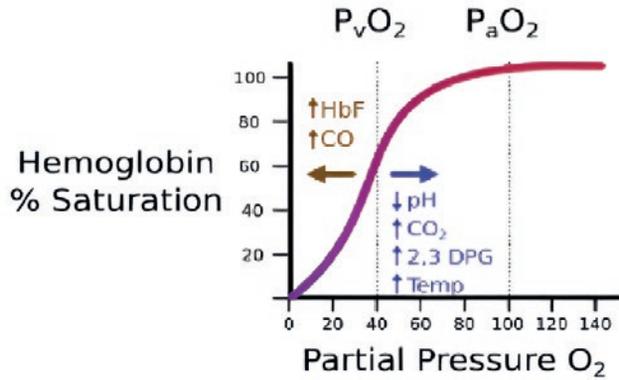

CARBOXY SKIN: RESULTS ARE IN

BENEFITS OF CO2LIFT WITH SURGICAL CASES

- Acts like a topical Hyperbaric Oxygen Therapy
- Increases microcirculation & tissue regeneration
- Helps reduce recovery time & complications
- Improves healing & outcomes
- Reduces risk of necrosis with fat grafting procedures

HOW IT WORKS

Carboxytherapy is the use of carbon dioxide (CO₂) to regenerate the skin. When the gas is delivered through the gel to skin, the body responds by rushing oxygen rich blood to the tissue, (the Bohr Effect principle) leading to an induction of new collagen, tissue regeneration, and increased oxygenation and microcirculation.

CLINICAL RESULTS

HOW TO USE

PRE-TREAT for 1-3 treatments, 1 week - 1 day before any energy, laser or ablative treatments, chemical peels, injectables or surgical procedures to prep the skin, increase hydration, and get better quality skin.

POST-TREAT for 3 treatments, immediately after any energy, laser or ablative treatments, injectables or surgical procedures to speed healing, decrease downtime, and improve clinical outcomes. Maintain with 1 treatment monthly.

STANDALONE for 3 treatments, weekly. Maintain with 1 treatment monthly.

INCREASE HYDRATION BY 117%

compared to baseline post treatment for up to 3 weeks.¹

CLINICAL RESULTS

100% RE-EPITHELIALIZATION

or complete healing within 1 month for 10 diabetic ulcer patients.²

REDUCED DOWNTIME

speedy healing, improved clinical outcomes, and higher patient satisfaction.³

IMPROVES ELASTICITY BY 26%

at week 4 after 6 treatments, and continued improvement of 28% at week 10.⁴
